Public fountain

Public fountain – Velké Pavlovice

Product description

Public fountain made from fibre composite material (glass fibre reinforced concrete, GFRC) is suitable supplement especially into modern exteriors.

Public fountain has modern shaped design in form of deformed octagon pyramid.

Upper perimeter of public fountain is created by smooth circular plate. Pedestal of public fountain and other accessories are produced according to request of consumer. Public fountain is anchored into foundation concrete foot.

Inlet and discharging rustless tubes belong to public fountain.

Surface of product can be untreated (classical concrete design) or with coating in any colour shade.

Product utilization

Public fountain from glass fibre reinforced concrete (GFRC) is suitable as decorative element for urban parks, squares and gardens.

Production of alternative design of upper perimeter and additional elements is possible after agreement with consumer.

Technical data of product

External diameter (mm)	2960
Depth (mm)	915

PROPERTIES OF UNICRET

Bulk density (kg.m ⁻³)	2050
Flexural strength (MPa)	11
Modulus of elasticity (GPa)	15
Proportional limit (MPa)	8
Impact strength (kJ.m ⁻²)	8
Absorptivity (% by weight)	10
Length changes due to moisture (mm/m)	1,5
Frost resistance after 150 cycles (%)	100
Reaction to fire class	A1

UNICRET meets the criteria of the company standard PN – VUSTAH 0208:2003.
